The new 'Snorri Snorkling VR'

Who hasn't wanted to glide through the water like a fish, explore an abandoned shipwreck on the deep ocean floor or swim with mythical creatures? All of this can only be experienced in our imagination... or with the help of the latest virtual reality technology. After the successful opening of YULLBE in September 2020, 'Snorri Snorkling VR' is another VR sensation that is unique in the world. Just in time for the reopening of the Rulantica water world on 3rd June 2021, Snorri welcomes visitors for a very special dive. Adults and children from 12 years old and 1.25m tall can literally dive into the fantastic world of the legendary island and go on a unique underwater tour alongside the lively Sixtopus Snorri. The idea was developed and implemented by MackNeXT in cooperation with VR Coaster. Michael Mack, managing partner of Europa-Park and founder of MackNeXT, says: "With Rulantica we have created an imaginative story world that is full of ideas, and with 'Snorri Snorkling VR' we are offering our guests another great new innovation which already enables children to experience an exciting VR journey around the mystical island of Rulantica."

'Snorri Snorkling VR' is an exclusive offer that can be booked by guests of the water world. A separate ticket for €6 is required for the VR underwater experience. The tickets are now available in the ticket shop and can be booked in addition to a regular Rulantica ticket. Subject to availability, it is also possible to purchase the additional ticket for 'Snorri Snorkling VR' on-site when visiting the water world. Located in two separate pools across from the 'Skog Lagoon', it's then time to put on snorkel and VR diving goggles and dive into a virtual adventure with the popular character Snorri.

If you can't get enough of virtual reality, you should also visit YULLBE, right next to the water world. Guests aged 12+ turn into heroes at 'Mission: Rulantica' and will overcome spectacular obstacles alongside their fellow players in this 30-minute adventure. On top of that, three brand-new 10-minute experiences promise VR entertainment for the whole family.
